Introducing **NEW TRADITIONALIST™ SPEEDSHOCKS**

- Nitrogen Gas Filled
- Engineered for hot rods
- Fits all popular shock kits
- 90 Durometer Neoprene Bushings
- Comes in SO-CAL red or show chrome

Speedshocks in Steel: We are proud to introduce our new line of Speedshocks in steel. These nitrogen filled gas shocks are engineered specifically for hot rod applications and offered in the "Standard" length of 9 1/4" closed x 14 1/4" extended or in the "Shorty" length of 7 7/8" closed x 11 1/4" extended. They are manufactured with or without dustcovers and can be run on the front or rear end of the car in either configuration. The distinctive design of the dustcover is reminiscent of the "airplane shocks" used on early hot rods during the 40's and 50's. Other features are 90 durometer replaceable 5/8" ID lower and 7/16" ID upper neoprene rubber bushings and they come finished in either high gloss SO-CAL red or show chrome.
