

# The SO-CAL Model A Frame

est. 1946

A. Perimeter Frame

SO-CAL has developed this affordable Model A buggy spring frame to get you started at the right price with the right product. The rectangular steel tube rails replicate the original Model A dimensions, however, we've upgraded the frame and included many of the fine details developed on our '32 Step-Boxed™ frames. The central K-member incorporates the brake pedal and master cylinder mounts as well as a transmission mount that accommodates a wide variety of transmissions. The frame also includes a Model A-style transverse leaf spring rear cross member which faithfully follows Ford dimensions.

### SO-CAL Model A Perimeter Frame:

(A) Perimeter frame, get-you-started perimeter frame which includes only the front and rear crossmembers.

#001-70910 SO-CAL Model A perimeter frame: \$1299.99

All SO-CAL Step-Boxed™ frames are numbered and each comes complete with a cast, three dimensional tag carrying the frame number. SO-CAL keeps this number on record to further enhance your investment.

B. Complete Frame

### SO-CAL Model A Complete Frame:

(B) Complete frame, which includes all of the above listed welded-on components such as crossmembers, engine mounts, etc. All SO-CAL frames, (including the perimeter frame) come numbered and tagged for added value.

#001-70900 SO-CAL Model A complete frame with buggy spring rear: \$2599.99
